Network Operations Subcommittee

AMERICAN NATIONAL STANDARD

ANSI/SCTE 37 2017

**Hybrid Fiber/Coax Outside Plant Status Monitoring
SCTE-HMS-ROOTS
Management Information Base (MIB) Definition**

NOTICE

The Society of Cable Telecommunications Engineers (SCTE) Standards and Operational Practices (hereafter called “documents”) are intended to serve the public interest by providing specifications, test methods and procedures that promote uniformity of product, interchangeability, best practices and ultimately the long term reliability of broadband communications facilities. These documents shall not in any way preclude any member or non-member of SCTE from manufacturing or selling products not conforming to such documents, nor shall the existence of such standards preclude their voluntary use by those other than SCTE members.

SCTE assumes no obligations or liability whatsoever to any party who may adopt the documents. Such adopting party assumes all risks associated with adoption of these documents, and accepts full responsibility for any damage and/or claims arising from the adoption of such documents.

Attention is called to the possibility that implementation of this document may require the use of subject matter covered by patent rights. By publication of this document, no position is taken with respect to the existence or validity of any patent rights in connection therewith. SCTE shall not be responsible for identifying patents for which a license may be required or for conducting inquiries into the legal validity or scope of those patents that are brought to its attention.

Patent holders who believe that they hold patents which are essential to the implementation of this document have been requested to provide information about those patents and any related licensing terms and conditions. Any such declarations made before or after publication of this document are available on the SCTE web site at <http://www.scte.org>.

Contents

1. SCOPE	4
2. COPYRIGHT	4
3. NORMATIVE REFERENCE	4
4. INFORMATIVE REFERENCE	4
5. TERMS AND DEFINITIONS	4
6. REQUIREMENTS	4

1. Scope

This document is identical to SCTE 37 2010 except for informative components which may have been updated such as the title page, NOTICE text, headers and footers. No normative changes have been made to this document.

This document provides the branch object identifiers for each of the MIBs within the SCTE HMS Tree. This document has been revised; see the Description in the syntax.

2. Copyright

The MIB definition found in this document may be incorporated directly in products without further permission from the copyright owner, SCTE.

3. Normative Reference

IETF RFC 2578 SNMPv2-SMI
IETF RFC 1155
SCTE 36

4. Informative Reference

None

5. Terms and Definitions

This document defines the following terms:

Management Information Base (MIB) - the specification of information in a manner that allows standard access through a network management protocol.

6. Requirements

This section defines the mandatory syntax of the SCTE-HMS-ROOTS MIB. It follows the IETF Simple Network Management Protocol (SNMP) for defining the managed objects.

The syntax is given below.

SCTE-HMS-ROOTS DEFINITIONS ::= BEGIN

IMPORTS

MODULE-IDENTITY
FROM SNMPv2-SMI
scteRoot, scteHmsTree
FROM SCTE-ROOT;

hmsScteRootMIB MODULE-IDENTITY

LAST-UPDATED "201002011455Z" -- **Feb 1, 2010**
ORGANIZATION "SCTE HMS Working Group"
CONTACT-INFO

"SCTE HMS Subcommittee, Chairman
mailto: standards@SCTE.org"

DESCRIPTION

"This MIB module is defining objects under the SCTE HMS tree."

REVISION "201002011455Z" -- Feb 1, 2010

DESCRIPTION

"1. Fixed spelling of the word (auxiliary).
2. Detailed Description of Module Identity Change:
The Module Identity for [::= { scteHmsTree 0 }] is already being used in SCTE 84-1 [heCommonTrapPrefix ::= {scteHmsTree 0}]. This is the OID that defines HMS Traps, and cannot be changed without causing existing programs that handle traps to change. In order to avoid the duplicate definition this module identity becomes scteRoot (2). There will be no change for existing applications that have implemented this mib. "

REVISION "200904210000Z" -- April 21, 2009

DESCRIPTION

"Changed Module Identity definition."

REVISION "200803040000Z" -- March 04, 2008

DESCRIPTION

"Updated the revision information of the file"

REVISION "200802040000Z" -- Feb 04, 2008

DESCRIPTION

"Modified with comments from Meeting 1-11-08

1. Removed import of enterprises and OBJECT-TYPE which was never used.
2. Added word Over, in Voice Over IP description.
3. Standard Module Identity was added since released version."

REVISION "200708150000Z" -- Aug 15, 2007

DESCRIPTION

"Added Multi Media to the list "

REVISION "200705261730Z" -- May 26, 2007

DESCRIPTION

"Added voipIdent to the list."

::= { scteRoot 2 }

propertyIdent OBJECT IDENTIFIER ::= { scteHmsTree 1 }

-- DESCRIPTION

-- "Defines the base OID of the property MIB"

-- "SCTE-HMS-PROPERTY-MIB is defined by SCTE 38-1 (formerly HMS026)"

alarmsIdent OBJECT IDENTIFIER ::= { scteHmsTree 2 }

-- DESCRIPTION

-- "Defines the base OID of the Alarms MIB"

-- "SCTE-HMS-ALARMS-MIB is defined by SCTE 38-2 (formerly HMS023)"

commonIdent OBJECT IDENTIFIER ::= { scteHmsTree 3 }

-- DESCRIPTION

-- "Defines the base OID of the Common MIB"

-- "SCTE-HMS-COMMON-MIB is defined by SCTE 38-3 (formerly HMS024)"

psIdent OBJECT IDENTIFIER ::= { scteHmsTree 4 }

-- DESCRIPTION

-- "Defines the base OID of the Power Supply MIB"

-- "SCTE-HMS-PS-MIB is defined by SCTE 38-4 (formerly HMS027)"

fnIdent OBJECT IDENTIFIER ::= { scteHmsTree 5 }

-- DESCRIPTION
-- "Defines the base OID of the Fiber Node MIB"
-- "SCTE-HMS-FIBERNODE-MIB is defined by SCTE 38-5 (formerly HMS025)"
